PROFESSIONAL SUMMARY

Data Analyst and BI Specialist with 4+ years at Cognizant building SQL data pipelines, Power BI dashboards, and Python-automated reporting for enterprise clients across global markets. Delivered 95%+ data accuracy, 30% reporting efficiency gains, and scalable cloud analytics on Azure. GDPR-aware. Open to relocation across Europe.

WORK EXPERIENCE

Data Analyst – Product Analytics | Cognizant Technology Solutions | Oct 2021 – Present | India

- **Designed and maintained Power BI (DAX) and Tableau dashboards** for 8+ enterprise applications — reducing manual reporting effort by 30% and providing operations leadership with near real-time KPI visibility and trend analysis to support strategic decisions.
- **Built and optimised Advanced SQL queries and data pipelines** across datasets of 500K–1M+ records — improving query performance by 25–40% and accelerating analytical throughput for reporting and business intelligence workflows.
- **Developed ETL / ELT pipelines using SQL Server and Azure Databricks** for data ingestion, transformation, and validation — achieving 95%+ data accuracy across Dev, QA, and Production environments while reducing downstream discrepancies by 35%.
- **Automated Python-based (Pandas, NumPy) reporting and data cleansing workflows** — replacing manual processes, cutting analyst effort by ~40% per reporting cycle, and improving consistency and audit-readiness across business deliverables.
- **Delivered predictive analytics and data storytelling** to cross-functional stakeholders — including a customer retention model (+15% accuracy) and an insurance claims dashboard — translating complex datasets into clear business recommendations.
- **Implemented data governance and quality frameworks** — applying automated reconciliation, root cause analysis, and GDPR-aligned data handling practices — resolving 95%+ of data defects within SLA and strengthening compliance standards.

PROJECTS

Financial Operations Analytics 2025–2026 | [GitHub](#) | [Live Demo](#)

Finance domain · Python, Statistical Analysis, KPI automation, cost anomaly detection · Full lifecycle: ingestion → analysis → reporting

- Automated financial performance reporting using Python (statistical analysis and EDA) — detecting cost anomalies and operational risk signals across financial datasets, reducing manual effort by ~40% and improving decision visibility for finance operations teams.

Retail Analytics Pipeline 2025–2026 | [GitHub](#) | [Live Demo](#)

Retail domain · SQL, Python, Power BI, ETL pipeline · End-to-end: raw data → transformation → BI dashboard

- Built a scalable ETL data pipeline for 10,000+ SKU retail datasets using SQL + Python, integrated with Power BI for real-time KPI tracking of revenue, inventory, and sales performance — enabling data-driven operations decisions and reducing data silos.

Data Quality Watchtower 2025–2026 | [GitHub](#) | [Live Demo](#)

Data Governance · Python, REST API, rule-based validation · GDPR-aligned data handling and audit compliance

- Engineered a production-grade data quality monitoring platform with null, schema, range, and consistency validation rules and REST API ingestion — reducing reporting errors by 35% and ensuring data integrity and compliance standards across enterprise datasets.

Healthcare Decision Intelligence 2025–2026 | [GitHub](#) | [Live Demo](#)

Healthcare domain · Python, EDA, Predictive Modeling, Streamlit · Operational insights dashboard

- Developed an interactive healthcare analytics dashboard consolidating patient and operational metrics — applying EDA and predictive modeling to generate actionable insights for administrators and demonstrating cross-sector analytics adaptability.

SKILLS

Data & Querying: Advanced SQL (SQL Server, PostgreSQL), Python (Pandas, NumPy, Matplotlib, Seaborn), Excel (Advanced)

BI & Visualisation: Power BI (DAX), Tableau, Dashboard Development, KPI Reporting, Data Visualisation, Business Intelligence

Data Engineering: ETL / ELT Development, Data Pipelines, Data Modeling, Data Warehousing, Azure Databricks, Azure Data Factory (ADF), Microsoft Fabric, Cloud Analytics, Big Data

Analytics & Methods: Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Analytics, Root Cause Analysis, Data Cleansing, Data Transformation

Governance & Compliance: Data Governance, Data Quality Monitoring, GDPR Awareness, Reconciliation, Audit Readiness, Compliance Standards

Soft Skills: Stakeholder communication, data storytelling, cross-functional collaboration, structured problem-solving, Agile delivery

Languages: English (proficient) · German (A2–B1, actively improving)

CERTIFICATIONS

- Introduction to End-to-End Analytics using Microsoft Fabric – Microsoft (2026)
- Databricks Fundamentals – Databricks (2026)
- Data Analytics Job Simulation – Deloitte (2026)
- SQL: Data Reporting and Analysis – LinkedIn Learning
- Business Analytics – UpGrad (2022–2023): SQL, Python, Statistical Methods, BI, KPI Frameworks

EDUCATION

Master of Computer Applications (MCA) | University of Mysore | 08/2022 – 04/2024 | Mysore, India

Relevant coursework: Business Analytics, Statistical Methods, Data Systems, Enterprise Application Design, Predictive Modeling

Bachelor of Computer Applications (BCA) | Techno Main Saltlake (MAKAUT) | 08/2017 – 08/2020 | Kolkata, India

RECOGNITION & PORTFOLIO

Live Project Portfolio: arnab-mondal-portfolio.vercel.app — 4 production-ready analytics applications across Finance, Retail, Healthcare, and Data Governance — available for live review.

Deloitte Certified: Completed Deloitte's official Data Analytics Job Simulation — demonstrating structured analytical thinking, data interpretation, and business-impact communication aligned with global consulting standards.

Languages: English (C2 — Native) · Hindi (Native) · German (B1 — active study; targeting C1 by end of 2026)
